

Please reject NAB petition 04-160.

I live in a rural area, where sometimes the "local" stations don't come in so well. I rely on satellite radio, with its traffic and weather channels, to know what to expect as I head into work each morning and home each day. I have been unable to find the variety and quality of programming anywhere else. And I am paid subscriber so that I can hear what I want. The National Association of Broadcasters should not be allowed to dictate what I hear.

Again, I respectfully urge and request you to please reject NAB's petition 04-160.

Thank you for your time.

Respectfully,
Michelle J Schwerha
